

## LING508 Unit 1 Week 1 Milestone: Use Cases

### Project: “TrovaRicetta” – Italian Recipe Finder

#### Use Case 1

User enters a meal category and list of ingredients. The application returns matching Italian recipes.

E.g.

*meal type (dropdown) - antipasto, primo, secondo, **dolce***

*ingredients (checklist) - ova, farina, latte*

*ricette – Torta Paradiso, Ciambellone etc.*

#### Use Case 2

App response shows ingredient list in Italian with English translations.

#### Use Case 3

Recipe steps highlight verb forms.

#### Use Case 4

App displays Italian vocabulary that are closely related (synonyms) to the verbs in the recipe.
